

Bundle E2 Maternal Safety

Measure Bundle Objectives			
Improve maternal safety and reduce maternal morbidity through data driven interventions to prevent and manage obstetric hemorrhage.			
Target Population			
All deliveries in a performing providers system			
Related System Components			
Birthing Hospital			
<i>NOTE: System components are included for planning purposes only and are not intended to further narrow the measure bundle target population or measure denominator specifications</i>			
Measures Outpatient Services	No	Measures Hospital Based Services	Yes

E2-601: OB Hemorrhage - Risk Assessment

Measure Description:

What cumulative proportion of mothers had a hemorrhage risk assessment with risk level assigned, performed at least once between admission and birth and shared among the team?

E2-601: OB Hemorrhage - Risk Assessment			
DY9/DY10 Program ID	E2-601		
Measure Details	Steward: Alliance for Innovation on Maternal Health (AIM) NQF #: NA Source: https://safehealthcareforeverywoman.org/wp-content/uploads/2019/02/AIM-Data-Collection-Plan_Latest-v2-4-19-1.xlsx https://safehealthcareforeverywoman.org/aim-data/		
Data Source	E.H.R., Claims, Local data sources i.e. logbooks, chart review, unit reports		
Required Status	Required		
Measure Classification	Type: Process	Measure Parts: 1	
Achievement Calculations	Category: P4P	Goal Calculation: IOS HPL: NA MPL: NA NA	Directionality: Positive
Unit of Measurement for Payer Type	Unit: Encounters Measure will be reported for all-payer, medicaid, and uninsured unless an exception is requested and approved through the RHP Plan Update.		
Baseline Details	Shortened baseline measurement period is allowed with justification submitted in the RHP Plan Update. Measure is not eligible for a baseline of 0.		
Denominator Description			
DSRIP Attributed Target Population during the measurement year			
Denominator Inclusions			
NA			
Denominator Exclusions			
NA			
Numerator Description			
Deliveries with a hemorrhage risk assessment with risk level assigned, performed at least once between admission and birth and shared among the team			
Numerator Inclusions (Performance Met)			
NA			

E2-601: OB Hemorrhage - Risk Assessment

Numerator Exclusions (Performance Not Met)

NA

DSRIP Specific Modifications

For DSRIP reporting purposes, the numerator and denominator are not be reported as estimates, and the measurement period is reported as a performance year, not as a quarter.

Additional Information

DRAFT

E2-602: OB Hemorrhage - Quantified Blood Loss

Measure Description:

What proportion of mothers had measurement of blood loss from birth through the recovery period using quantitative and cumulative techniques?

E2-602: OB Hemorrhage - Quantified Blood Loss			
DY9/DY10 Program ID	E2-602		
Measure Details	Steward: Alliance for Innovation on Maternal Health (AIM) NQF #: NA Source: https://safehealthcareforeverywoman.org/wp-content/uploads/2019/02/AIM-Data-Collection-Plan_Latest-v2-4-19-1.xlsx https://safehealthcareforeverywoman.org/aim-data/
